

# Privatisering eller Kaos?

– tanker afledt af Dobat i Arkæologisk Forum nr. 49

## Abstract

### Privatisation or Chaos?

– Thoughts derived from Dobat 2023 in Arkæologisk Forum no. 49

*In Arkæologisk Forum no. 49, Andres Dobat suggested that for the benefit of professional development and research development-led archaeology in Denmark ought to be commercialised (Dobat 2023). Several problems concerning Dobat's suggestion are pointed out in this reply, including the fact that it would be inappropriate for developers and that it would create uncertainty about the fate of archaeological artefacts. Instead, this reply suggests that efforts should be made to ensure that archaeological museums are better funded to ensure the development of the profession and the necessary research.*
